

# Emerging Information Technologies for Earth and Space Studies

**Tom Soderstrom, JPL IT Chief Technology and Innovation Officer**  
**Stephanie Granger, JPL Applied Science System Engineering**

**December 2018**

# The Birth of U. S. Space Exploration

January 31, 1958

# Exploring new worlds and advancing understanding of our home planet

Why? To help us answer the BIG questions

How do we protect Mother Earth?

How do we divert an asteroid?

Are we alone?

How did the Universe form and where is it going?

Can we find Earth 2.0?

Is/was there life on Mars?

# Seven new mission launched in May 2018 (a JPL record)

*Cold Atom Lab and Raincube*

*InSight lander*

*Two Mars CubeSat Ones*

*TEMPEST-D CubeSat*

*CubeRRT CubeSat*

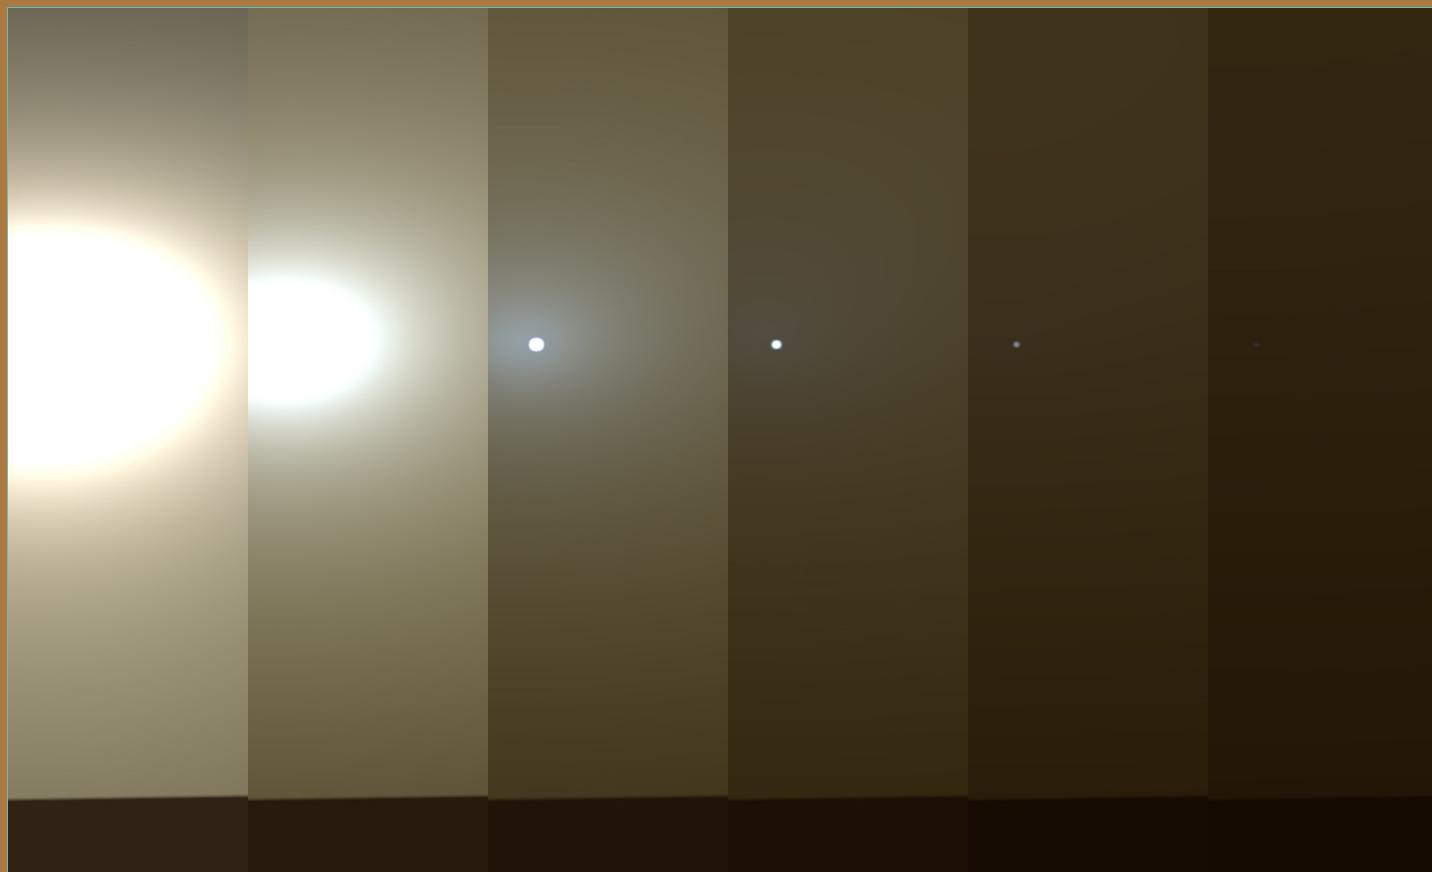

*GRACE-FO*

Curiosity: Did/does Mars house life?

## Opportunity Hunkers Down During Dust Storm

# Gain InSight to Mars' interior

<https://vimeo.com/302127206>

# InSight Media Reel 3 - Animation

November 21, 2018 4:00

LOCATION	DURATION	
00:07	1:13	InSight Entry, Descent, and Landing (EDL) Animation
01:21	2:13	InSight Instrument Deployment Animation
03:35	0:20	Mars Cube One (MarCO) Relaying EDL Data to Earth in Near Real-time

# How can we infuse emerging technologies into the enterprise?

Enjoy the benefits of surfing (user experience)  
and  
leverage the power and future of the wave (back end)  
and  
spend time doing it (priorities and focus)

# WHAT ARE THE EMERGING TECHNOLOGY WAVES?

## New Habits

Work from anywhere, always connected, gaming, sharing, open source, reduced footprint, cord-cutting

## Cyber Security Challenges

At scale, authentication, encryption by default, role-based training, BlockChain

## Applied AI

Deep Learning, Machine Learning, IA, Intelligent Digital Assistants, NLP, automation, data-driven, APIs, analytics, combinations

**BUILT-IN INTELLIGENCE EVERYWHERE**

## Accelerated Computing

Serverless, edge computing, HPC, GPUs, Neuromorphic, Quantum

## Ubiquitous Computing

Mobile, smart devices, AR, IoT, NUI

## Software Defined Everything

Programming everything, APIs, Software Defined Networks, containers, DevOps, Open Source, self-healing, everything distributed

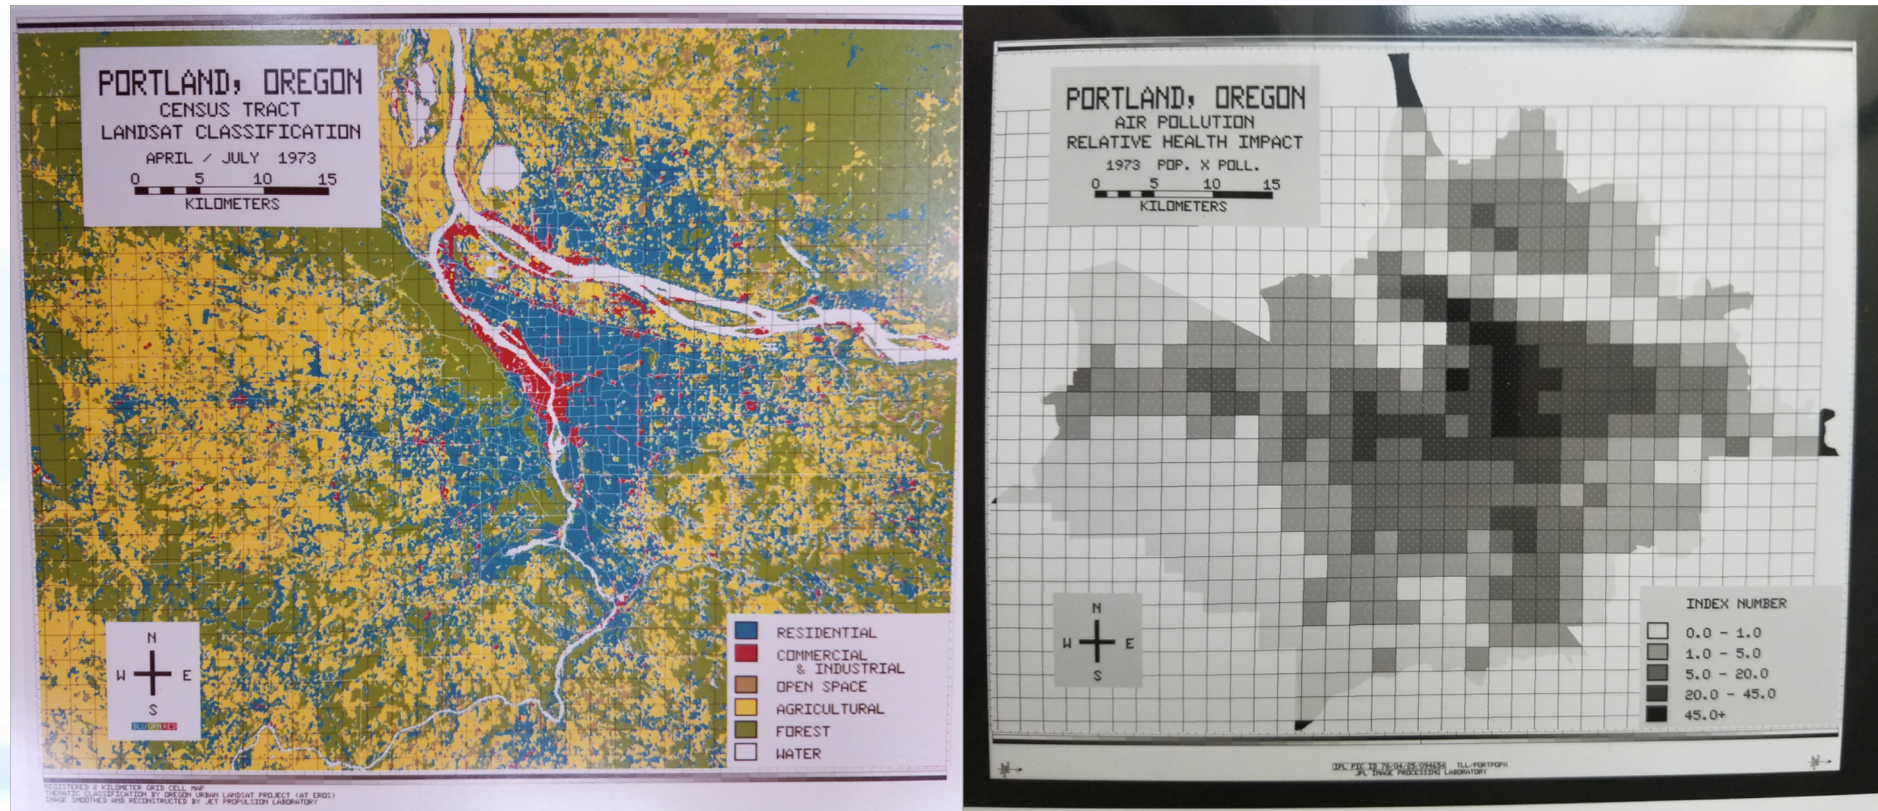

# HOW CAN YOU BENEFIT?

# IBIS: Image-Based Information System

## 1978: Digital Image Processing meets Cartography

<https://swot.jpl.nasa.gov/>

# Migration to the Cloud

Credit: NASA

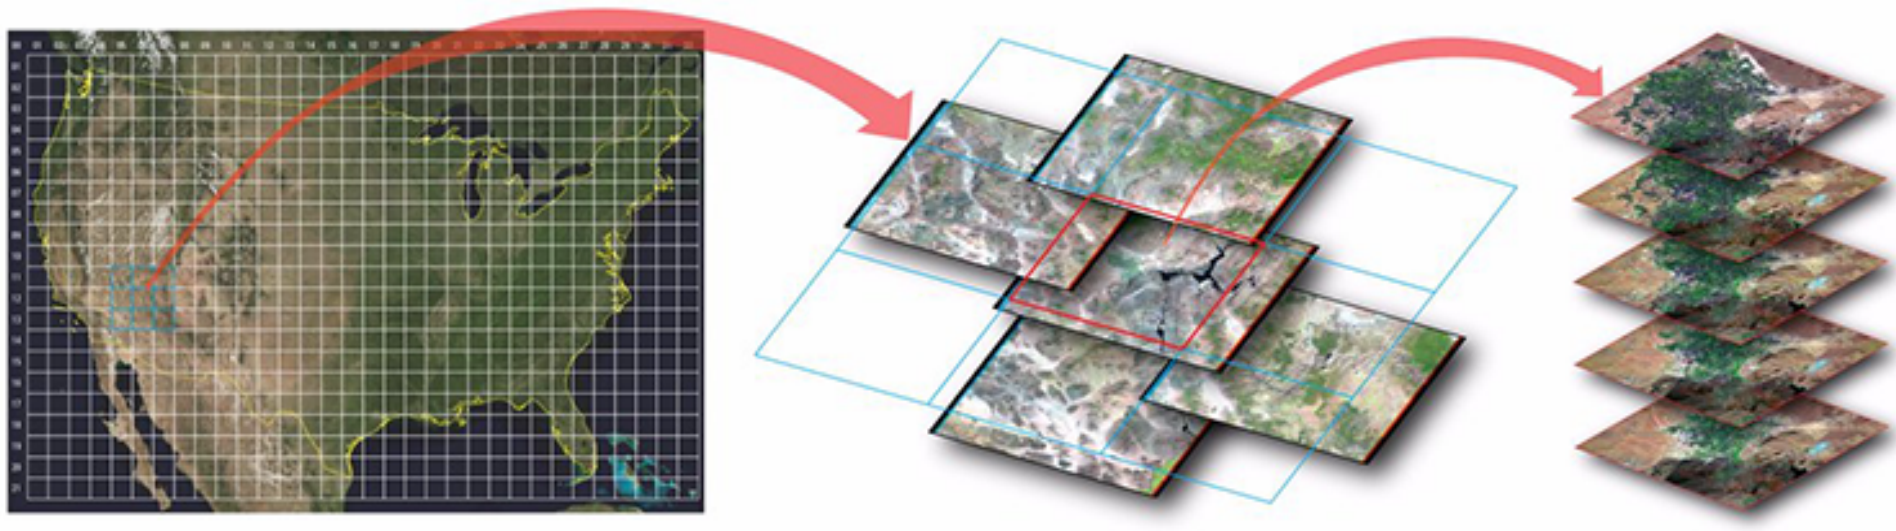

Credit: Sam Johnston for Wikipedia

**NASA/JPL's Physical Oceanography DAAC is one of the first DAAC to migrate to the cloud.**

# On-Demand Analysis Ready Data

**“Satellite data that have been processed ...and organized into a form that allows immediate analysis without additional user effort and interoperability with other datasets both through time and space.”**  
- CEOS (Committee on Earth Observation Satellites)

Credit: USGS Landsat

# Upcoming Launches

COSMIC-2  
April – June 2018

ECOSTRESS  
June 2018

Mars 2020

Mars Helicopter

NISAR 2021

SWOT 2021

Europa Clipper 2022

PSYCHE 2022

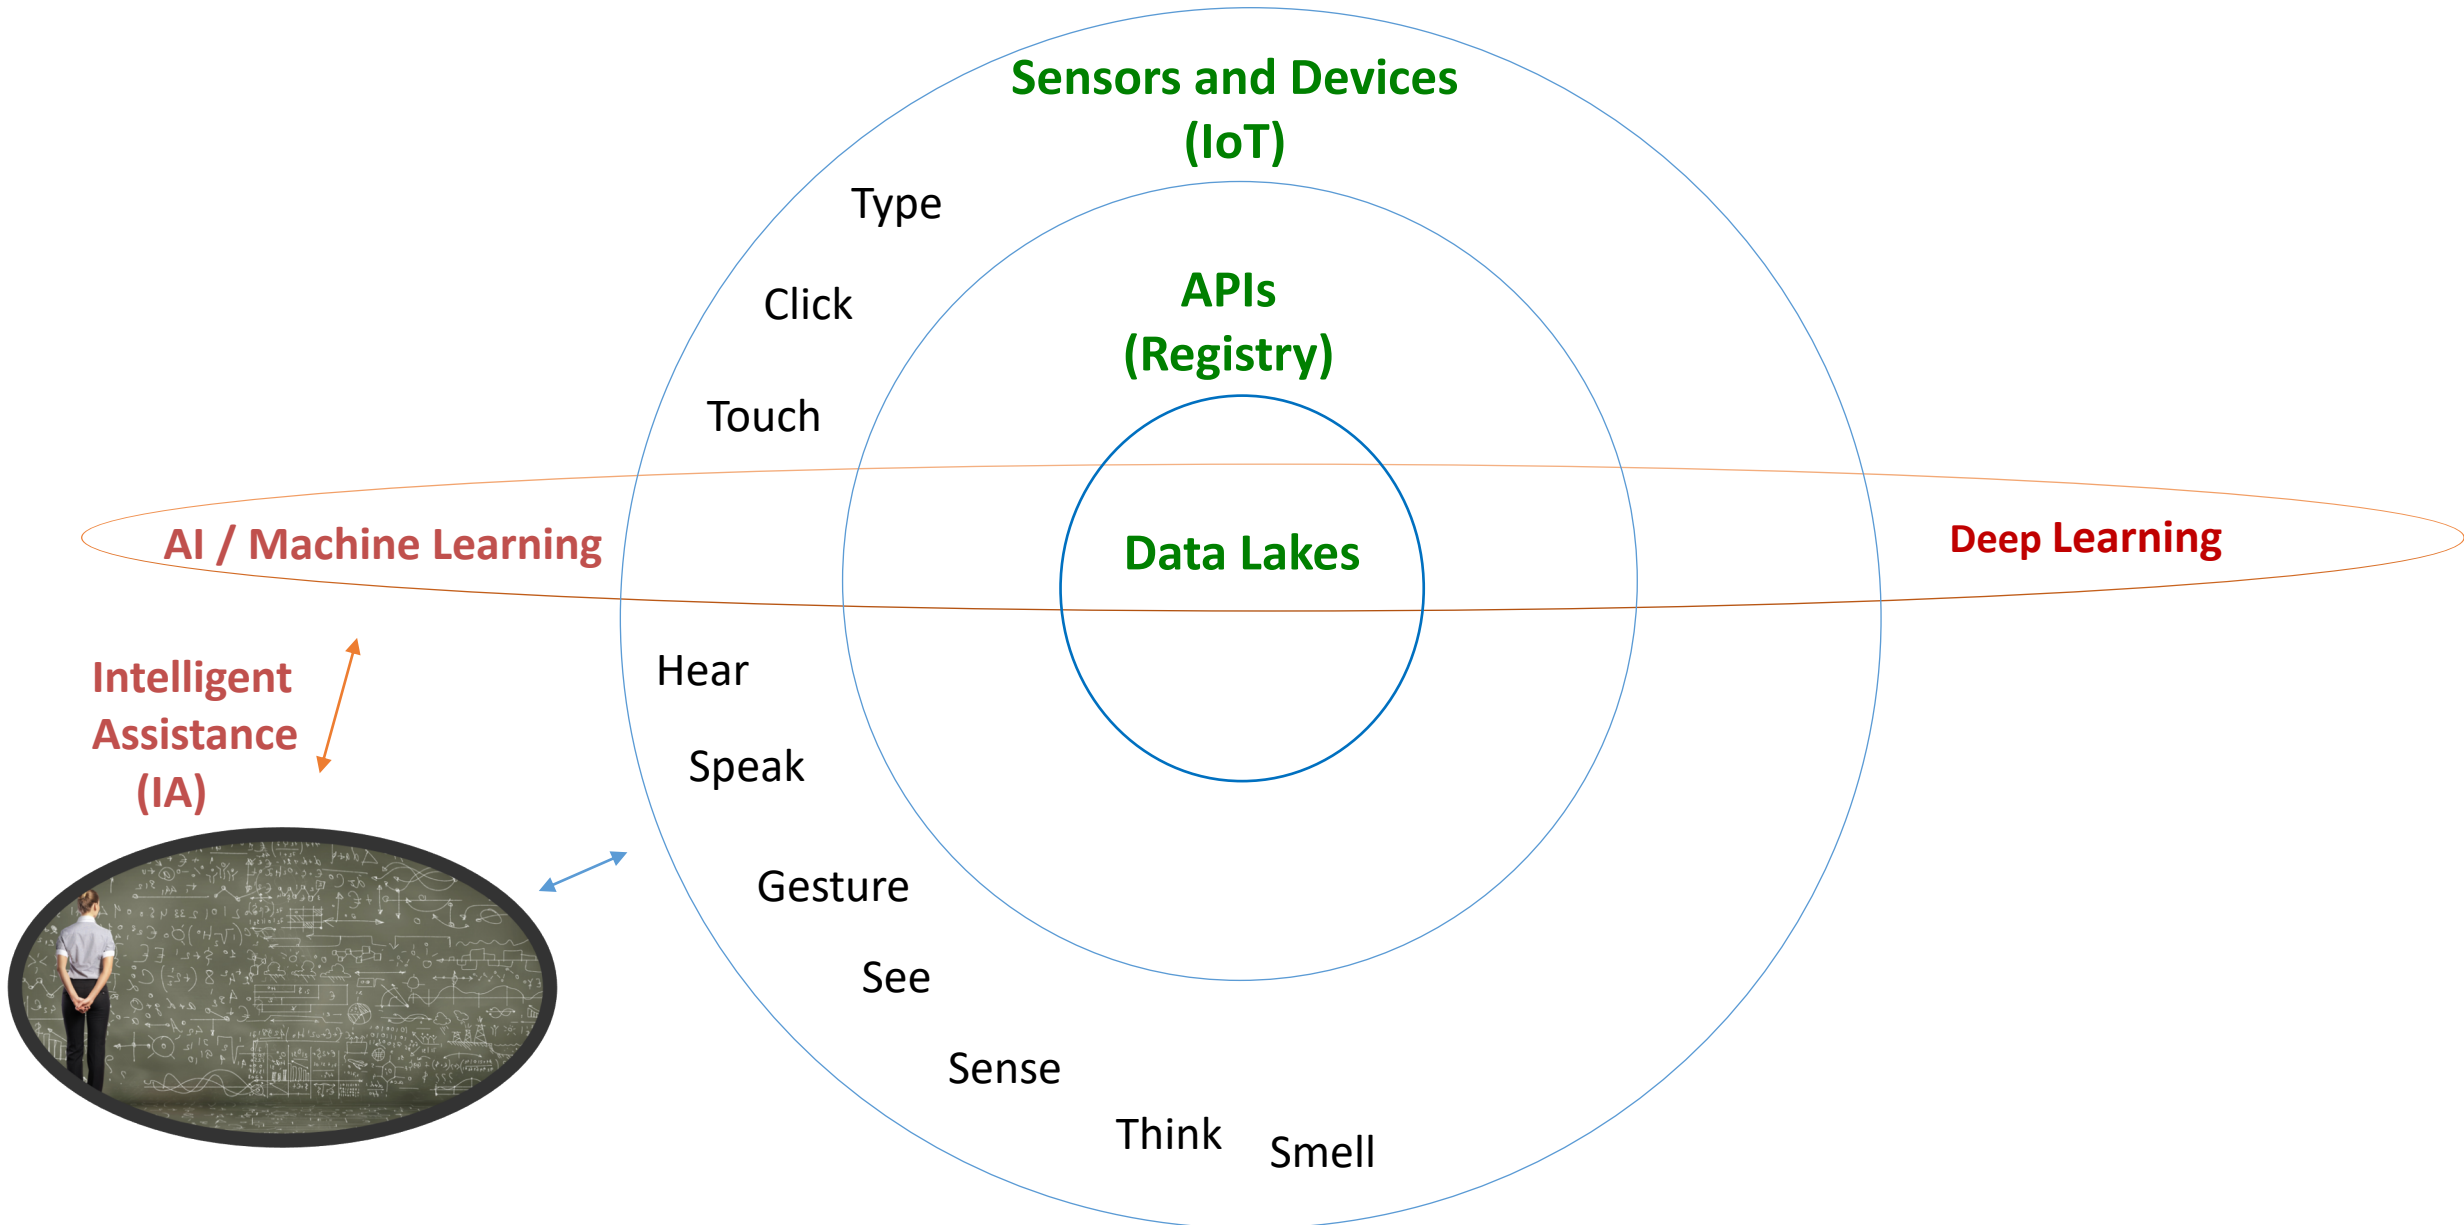

W E ' R E G O I N G B A C K !

# Mars 2020: Our next rover on Mars

# Our Vision of How We Will Work

*Leverages IOT, Programming, Smart Data, Cloud, and Artificial Intelligence, which can evolve at different cadences*

Prepare for next generation of explorers' ways of working

# Augmented and Virtual Reality

# NASA MARS

NASA'S FIRST  
ALEXA APP

"Alexa, enable NASA Mars"  
"How cold is Mars?"  
"Can people live on Mars?"  
...

- Separate IoT Network
- Serverless - safer and cheaper
- Natural user interfaces
- Using multiple senses
- Handles huge scale

# Opportunities

## Small Business Innovative Research (SBIR)

- Funds research, development, and demonstration of innovative technologies that fulfill NASA needs and have significant potential for successful commercialization. <https://sbir.jpl.nasa.gov/>

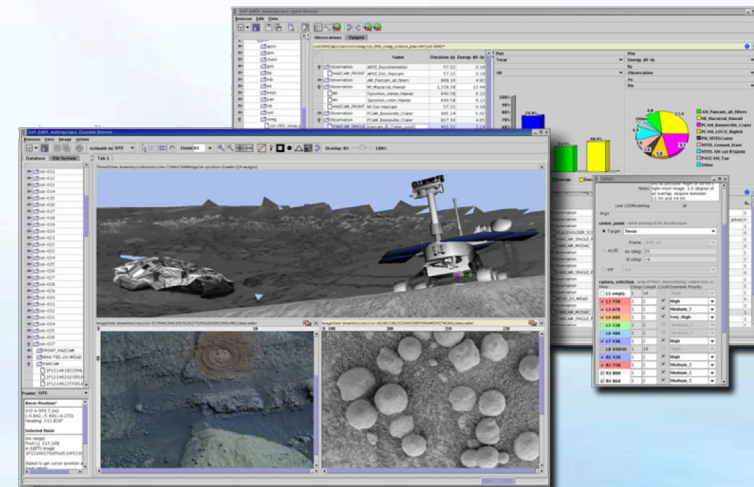

## NASA Western Water Applications Office (headquartered at JPL)

- Accelerates the application of NASA observations and analysis to timely water management problems. <https://water.jpl.nasa.gov/>

## JPL Office of Technology Transfer

- Facilitates the transfer of technologies to the commercial sector so that the public can directly benefit from outstanding researchers. <https://ott.jpl.nasa.gov/>
